screen2:

The image shows the App Inventor interface for a mobile application named "ListaDeTareas".

Top Left: The Designer view displays the screen layout. It features a title bar "Mi lista de tareas" and three buttons at the bottom: "Colocar tarea" (purple), "Eliminar tarea" (pink), and "Eliminar todo" (blue). Below these buttons is a list area containing the text "entregar tarea" and "comprar pan".

Top Right: The Blocks Editor shows the code for the screen. It includes a "TinyBD1" component and several event blocks:

- "Cuando ColocarTareaBotón1 Clic": Triggers when the "Colocar tarea" button is clicked. It adds the text from the "Texto1" input field to the global list "ListaDeTareas" and updates the list view.
- "Cuando BorrarTareaBotón1 Clic": Triggers when the "Eliminar tarea" button is clicked. It removes the selected item from the list and updates the list view.
- "Cuando EliminarTodoBotón1 Clic": Triggers when the "Eliminar todo" button is clicked. It clears the list and updates the list view.
- "Cuando Screen2 Inicializar": Triggers when the screen initializes. It sets up the initial state of the list and its view.

Bottom: A screenshot of the app running on a device shows the final state of the list: "entregar tarea" and "comprar pan".
